## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, 18-35, and 37-38 drawn to nucleic acid molecules, vectors, compositions and cells comprising a nucleic acid molecule, classified in class 435, subclass 325.
  - II. Claims 13-17, and 39 drawn to a method of producing chimeric RNA molecule in a cell, classified in class 435, and subclass 6.
  - III. Claim 36, drawn to a method for inhibiting the expression of papilloma virus pre-mRNA, classified in class 435, subclass 375.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II-III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the nucleic acid molecules, vectors and cells recited in invention I can be used for the production of proteins encoded by the gene encoded by the nucleic acid molecules comprised within the recited vectors.
4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Art Unit: 1635

inventions are drawn to different methods comprising different objectives and reciting different method steps.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
